CHECKLIST

Gully Clearing Checklist

- [ ] Position vehicle to shield the work area from traffic
- [ ] Lift grate and inspect pot for damage or standing water
- [ ] Jet pot walls from top to bottom, then clear connection pipe
- [ ] Extract slurry with vacuum hose until pot drains freely
- [ ] Record gully reference and any defects observed
- [ ] Schedule return visits for gullies missed due to parked vehicles
- [ ] Discharge waste at licensed site and rinse tanks between loads
- [ ] Flag blocked downstream pipes for CCTV survey and repair
