CHECKLIST

Non-chemical weed control planning checklist

- [ ] Assess surface type and public access levels for each site
- [ ] Choose thermal or mechanical methods based on safety and coverage needs
- [ ] Schedule repeat visits every four to eight weeks during growing season
- [ ] Treat young weeds in spring and early summer before they set seed
- [ ] Adjust budgets and contract specifications for increased frequency
- [ ] Coordinate weed control with drainage and verge maintenance visits
- [ ] Keep records of treatment dates, methods and areas covered
