CHECKLIST

Footway reconstruction planning checklist

- [ ] Commission a condition survey with trial pits to assess sub-base and drainage
- [ ] Review utility records for recent trenching or service conflicts
- [ ] Check for tree root activity and arrange arborist involvement if needed
- [ ] Specify materials and depths appropriate to expected loading
- [ ] Plan traffic management and maintain property access throughout
- [ ] Integrate drainage repairs during excavation to correct falls and renew gullies
- [ ] Set reinstatement standards for future utility works to protect the investment
- [ ] Schedule regular surface maintenance to prevent water ingress after completion
